The PPP in sports allows attracting of 4.5 private per 1 budget ruble

According to Deputy Minister of Sports Azat Kadyrov, the mechanism of public-private partnership in sports allows to attract 4.5 rubles of private ones for 1 budget ruble. "This is a fairly good, interesting indicator that allows the state to stimulate the development of this institution in future," Azat Kadyrov stressed. He noted that within the framework of the federal target program for the development of physical culture and sports, which ends this year, a separate mechanism was provided, a separate line of financing for projects with the involvement of private partners, which made it possible to start the implementation of 13 facilities.

PPP and investment news

A rope way is planned to be built in Perm by the Public Private Partnership (PPP)

In Perm, it was planned to build an aerial metro in the format of rope way lines based on the PPP. The proposed concept of the project in Perm includes the construction of six rope way stations, and the total length of the network is 3.55 km. Under the concession agreement, the region can also provide land plots for the construction of stations and poles. According to calculations by the Center for Economic Development of RF, the estimated cost of building the rope way in the Perm landscape will amount to 1.27 billion rubles. The occupancy rate of the rope way in Perm is estimated at 3.6–3.7 million passengers per year.

To renew the electric transport of Izhevsk the authorities of Udmurtia intend to attract 19 billion rubles

In the next two years, it is planned to start modernizing the electric transport park in Izhevsk. For this, the authorities of Udmurtia intend to attract about 19 billion rubles. The urban transport renovation project is highly likely to be implemented. Perhaps we will postpone it from 2021 to 2022 due to the economic situation, Vnesheconombank supports us. The project involves a burden on the budget of Udmurtia. It will be of 180 to 360 million rubles.

A new gerontological center will open in Moscow by 2022

By 2022, a new gerontological center will open in Moscow for the elderly residents of the capital. The volume of investments for its creation and equipment will be about 500 million rubles. The city plans to conclude a concession agreement with the winning

investor for 20 years. According to the conditions of qualification, the participants must meet a number of criteria, including the availability of financial resources and experience in implementing similar projects. The preliminary stage of the open competitive tender has already been completed. The tender winner will undertake the reconstruction of the building, as well as its equipment, maintenance and repair. The area of the future center is 3,200 square meters. The center provides a minimum of 100 places for permanent residence of patients. There will also be a hospital for a day stay, where special meals, escorts and classes aimed at maintaining cognitive status will be carried out.
